

# Key Investor Information

**This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.**

## Bryth ICVC GBP

ISIN:

This Fund is managed by Thesis Unit Trust Management Limited.

### Objectives and Investment Policy

The investment objective of the Fund is to provide long-term capital growth and also growth in income.

The Fund seeks to achieve its objective by investing in a diversified global portfolio engaging in active asset allocation in light of market and economic conditions. The Fund looks to obtain exposure to equities by investing mainly in collective investment schemes (both actively managed and passive, and including exchange traded funds) as well as transferable securities. Fixed income instruments, money market instruments, cash, near cash and deposits may also be held and the Fund may increase its allocation to these assets when it perceives equity risk to be heightened.

The Fund may enter into hedging transactions to reduce currency or other exposures, if this appears to be in the best interests of its shareholders, in light of local market conditions in the countries concerned.

Investors should note that the Fund may, from time to time, invest in collective investment schemes which are managed or advised by the Investment Manager or other members of the Investment Manager Group.

The base currency of the Fund is Canadian dollars.

Income arising from the Fund is distributed to the holders of income shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- The Fund may use approved derivatives for the purpose of hedging only. Hedging is when a position is taken to offset a risk in an opposing currency, market or investment. It is anticipated that the outcome of the use of derivatives would be to reduce, rather than to increase, the risk profile of the Fund.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- The price of gold/natural resources in which the Fund invest may be subject to sudden, unexpected and substantial fluctuations that may lead to significant declines in the values of the shares concerned and hence the Net Asset Value of the Fund.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	6.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.10%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on estimated annual expenses for the year, the annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see please see section headed 'Payments out of Scheme Property' of the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

## Past Performance
