

Non-UCITS retail scheme - Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Harroway Capital ICVC

ISIN: GB00B76VCR60

This Fund is managed by Thesis Unit Trust Management Limited.

Objectives and Investment Policy

The investment approach is to create a global, multi-asset portfolio since different asset types perform at different points of the economic cycle. Through diversification and active positioning the manager will seek to obtain higher returns for a given level of risk. This is achieved through investing via direct and indirect means.

The manager may seek over certain periods, while particular market conditions prevail, to invest with a heavy bias towards any single asset class or type, reflecting their perspective of the investment cycle and their view of the optimal pay-off between risk and return. This may include holding substantial amounts of the Sub-Fund in cash from time to time in periods when the manager considers that other asset classes may be over-valued. The investment policy for achieving the objective is to invest in a portfolio of different asset types, either directly through a range of securities or through investment in collective investment schemes. The Sub-Fund will seek to use the full range of investment types as permitted by its investment and borrowing powers including shares, fixed income assets, warrants, units in regulated and unregulated collective investment schemes, money market instruments, deposits, cash, near cash and derivatives for the purpose of efficient portfolio management. Investment may be made in any geographic or economic sectors of the world or any asset class.

As part of this the Sub-Fund may invest in investment vehicles qualifying as transferable securities in order to gain indirect exposure to a diversified portfolio of assets including, but not limited to, commercial property, hedge Funds and commodities.

Derivatives and forward transactions may also be used for investment purposes, on providing Shareholders with 60 days' advance written notice. In the event that derivatives and forward transactions are used for investment purposes, the investment performance of the Sub-Fund could become highly volatile and thus increase the risk profile of the Fund.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares and reinvested in the case of accumulation shares. Investors can redeem shares on demand when the scheme prices each Thursday and last Business Day of each month at 10am.

Risk and Reward Profile

The risk rating of the Fund is category 3 due to the volatility of the Fund price which sits in a range of between 2% and 5%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Investment in other Funds may mean that the objectives and risk profiles of those underlying Funds may not (always) be fully in line with those of the Fund.
- Significant exposure to a particular industrial sector or geographical region puts the Fund at risk of a localised event making a significant impact on the value of the Fund.
- The Fund has a concentrated portfolio (holds a limited number of investments) and if one or more of these investments declines or is otherwise affected, it may have a pronounced effect on the Fund's value.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.99%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th June 2017. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

Performance source: Morningstar Direct

- The Fund launched in 2011
- The bar chart shows the calendar year returns for the last 6 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance
- Past performance has been calculated in pounds sterling
- Performance will be calculated as Total Return, including all charges levied against the Fund
- Past performance has limited value as a guide to future performance
- Investments may go down as well as up
