### Objectives and Investment Policy

The objective of the Fund is to achieve long-term capital growth.

The Fund shall invest mainly in equity securities of companies listed on stock exchanges anywhere in the world. There will be no restrictions on the countries, regions or industrial sectors in which invested. Equally there will be no presumption or expectation that the Fund will maintain asset allocation across all countries, regions or industrial sectors on an ongoing basis. The Fund will be free to invest globally, but there may be a bias towards one or more countries, regions or industrial sectors to the exclusion of other countries, regions or industrial sectors.

The Fund may also invest in the following types of assets located anywhere in the world:

- Other transferable securities (such as government and public securities, other debt instruments and exchange traded funds)
- Cash and near cash
- Deposits
- Other regulated collective investment schemes
- Money market instruments.

Derivatives may be used for efficient portfolio management only.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of simulated data which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the fund will actually be achieved.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
