

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM Fulcrum Diversified Core Absolute Return Fund Class C GBP

A sub fund of the TM Fulcrum UCITS Funds
Accumulation Shares ISIN: GB00BRTNY847
Income Shares ISIN: GB00BRTNY391

This Fund is managed by TUTMAN LLP. The Investment Manager is Fulcrum Asset Management LLP

Objectives and Investment Policy

The investment objective of the Fund is to aim to achieve long-term absolute returns of inflation + 3% to 5% in all market conditions over rolling five year annualised periods, with lower volatility than equity markets. In doing so the Fund aims to achieve a positive return on a rolling three year basis. However, a positive return is not guaranteed and a capital loss may occur.

Investors should be aware that the investors' capital is, in fact at risk, and there is no guarantee that these returns will be achieved, whether over rolling five year periods, or any time period.

In seeking to achieve its investment goal, the Fund will hold a diversified portfolio, typically consisting of equities, commodity related instruments, fixed income and cash either directly or indirectly through the use of derivatives. Investments may be made through collective investment schemes (including index funds such as exchange traded funds (ETFs) and actively managed funds managed by the Investment Manager). Indirect exposure to commodities may be sought through investment in transferable securities, eligible index derivatives and collective investment schemes.

The Fund will use derivatives for investment purposes and for efficient portfolio management. Such use of derivatives may therefore, at times, increase the volatility of the Fund's NAV and change the risk profile of the Fund. The Fund will use hedging strategies to reduce risk over the short time without materially altering its risk profile.

The Fund will be managed without reference to a benchmark.

The Fund will be managed with a forward looking volatility cap of 12%.

Inflation will be measured by reference to the Retail Prices Index.

Investments in collective investment schemes will not exceed 10% of the Fund's assets in aggregate.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the fund will actually be achieved.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.
- Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- The price of gold/natural resources in which the Fund invest may be subject to sudden, unexpected and substantial fluctuations that may lead to significant declines in the values of the shares concerned and hence the Net Asset Value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	3.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.92%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 30th September 2016. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see the section headed 'Charges and Expenses' in the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

(a) The Fund launched in 2014

(b) The bar chart shows the calendar year returns for the last 2 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

Performance source: Morningstar Direct
