

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

TM UBS (UK) - UK Income Focus Fund - Class A

A sub fund of the TM UBS (UK) Fund

ISIN: GB00B3BSDW66

This Fund is managed by Thesis Unit Trust Management Limited.

Objectives and Investment Policy

The objective of the Fund is to generate income through active management of a diversified portfolio.

The Fund will provide investors with an actively managed diversified portfolio with performance measured against the UBS AG, London Branch's proprietary 'UK Income Focus' benchmark, one of a range of UBS created multi asset class benchmarks specifically designed for the private investor. The Fund will invest primarily in UK equities, Government bonds, Corporate bonds and open ended collective investment vehicles.

At the Investment Adviser's discretion, the Fund may also invest in other transferable securities, money market instruments, cash and near cash.

It is not intended that the Fund invests in derivative instruments.

Fund selections and recommendations are made using a mix of quantitative and qualitative analysis. Analysts consider medium to long-term cumulative performance of funds (including ETFs) but also investigate discrete period returns and risk metrics. Fund managers passing filter tests are then met in order to gain an understanding of their investment process and current market positioning. Terms will be negotiated with any fund house chosen and thereafter due diligence is on-going through regular assessment of performance and update meetings.

The Fund is monitored against the benchmark specified, within a tolerance level of 5% (above or below). Any deviation from that tolerance level will be reviewed and action taken as applicable.

The base currency of the Fund is pounds sterling.

Income arising from the fund is distributed to the holders of income shares and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of the Fund price which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- Where structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.
- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.
- More political, economic or structural challenges face emerging markets or less developed countries than developed countries which may increase volatility and uncertainty.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.25%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.76%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on estimated annual expenses for the year, as currently there are no shares in issue for this class, the annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk
