

# Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Arch House Fund Class A

This Fund is managed by Thesis Unit Trust Management Limited

ISIN (Income): GB00BMH5VH56

### Objectives and Investment Policy

The investment objective of the Fund is to achieve capital growth and generate income (net of fees) over the long term (five years or more) with the generation of income being of secondary importance. There is no guarantee that a positive return will be achieved over five years, or any other period.

The Fund will invest 50-90% in global equities (both directly through transferable securities and indirectly through the use of collective investment schemes). The Fund will pursue its investment objective by constructing an international spread of investments and in any economic sector of the world.

The Fund may also invest in cash, money market instruments, deposits, warrants, fixed income and investment and sub investment grade debt securities (directly and indirectly through the use of collective investment schemes) and gold (indirectly) to attain its objectives. It is not intended that the Fund will have an interest in any immovable property or tangible movable property. The weighting of the investment in each asset may vary as appropriate and there may be times where there is no exposure to some asset classes.

Indirect investment in securities will be achieved by investing in either regulated or unregulated collective investment schemes (CIS), which includes exchange traded funds and investment trusts. The collective investment schemes in which the Fund invests may be managed by either the ACD, the Investment Manager or their associates.

The Investment Manager has the power to invest more than 35% in value of the Fund in government and other public securities. This power is restricted to bonds or other securities issued by the governments of the United Kingdom or the United States of America.

Derivatives may be used for efficient portfolio management in accordance with the FCA Rules. The use of derivatives for efficient portfolio management is unlikely to affect the risk profile of the Fund or be utilised frequently.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units. Investors can buy and sell units on demand when the scheme prices daily at 12 midday.

### Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of simulated data which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation. · Credit risk is the risk of loss stemming from a borrower's failure to repay the loan or meet its contractual obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

## Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	1.05%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st March 2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see sections headed "Charges and Expenses" of the Fund's Prospectus, which is available on request via email to [thesisut@tutman.co.uk](mailto:thesisut@tutman.co.uk)

## Past Performance

(a) The Fund launched in 2021

(b) The bar chart shows the calendar year returns for the last 2 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

Performance source: Morningstar Direct
