Meadowgate Balanced Fund

A sub Fund of the Meadowgate Funds

This Fund is managed by Thesis Unit Trust Management Limited ISIN (Accumulation):

GB00BK5ZFP97

ISIN (Income): GB00BK5ZFN73

Objectives and Investment Policy

The investment objective of the Fund is to maximise total return through a combination of growth and income.

The Fund invests in a diversified global portfolio. The Fund will have exposure of no less than 30% in equity markets and 30% in fixed income assets, typically indirectly through the use of collective investment schemes, although direct investments may be made. The Fund may also invest, directly or indirectly (through the use of collective investment schemes) in warrants, money market instruments, deposits, cash and near cash.

The use of derivatives and/or hedging transactions is permitted in connection with the Efficient Portfolio Management of the Fund. It is not intended that the use of derivatives for this purpose will be frequent.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income shares, and reinvested in the case of accumulation shares. Investors can buy and sell shares on demand when the scheme prices daily at 12 midday.

Risk and Reward Profile

The risk rating of the Fund is category 4 due to the volatility of simulated data which sits in a range of between 5% and 10%. The risk rating is calculated using historical data and a prescribed standard deviation methodology. The simulated data used is consistent with risk limits of the Fund.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative or structured product investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- The Fund may use derivatives to reduce costs, overall risk and/or generate additional capital or income. This is known as Efficient Portfolio Management (EPM). When used for EPM purposes, there should not be an increase in the overall risk level of the Fund.
- Where investments in the Fund are in currencies other than your own, changes in exchange rates may affect the value of your investments.
- Investment in other funds may mean that the objectives and risk profiles of those underlying funds may not (always) be fully in line with those of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.
