

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

The Steelback Fund

This Fund is managed by Tutman LLP

ISIN (Accumulation): GB00B1Z6Y293 ISIN (Income): GB00BP37WD92

Objectives and Investment Policy

The investment objective of the Company is to provide a combination of capital growth and income, net of fees, over a rolling 5 year period. The Company will invest in a global portfolio with no emphasis placed on any particular economic, industrial or geographical sector. The Company will, in normal market conditions, have exposure of 40-80% to equities listed on stock exchanges anywhere in the world. However, this allocation may fall below 40% under difficult market conditions in which the Portfolio Manager believes that markets are expensive or when higher volatility is anticipated. This could include (but is not limited to) markets resulting from, or anticipating, extreme events (for example, the 2008 global financial crisis). At the Portfolio Manager's discretion, and based on their assessment of market conditions as well as the economic environment, the Company can also invest in fixed income assets (e.g. government and corporate bonds), structured products (typically no more than 30% of the Company) and other transferable securities, money market instruments, deposits and cash or near cash investments. The Company may obtain this exposure directly or through investment in collective investment vehicles (regulated and unregulated including exchange traded vehicles and investment trusts) which may include other schemes managed by the ACD, or the Portfolio Manager or an associate of the ACD or Portfolio Manager. It may also gain exposure to alternative investments (i.e. commodities and property) indirectly via permitted investments such as collective investment vehicles. In addition, the Company may enter into derivative transactions for Efficient Portfolio Management (including hedging), although use is expected to be limited. The Portfolio Manager will actively manage the Company. This means the Portfolio Manager actively makes decisions about how to invest the Scheme Property (and which investments to buy and sell) instead of simply following a market index.

The base currency of the Fund is pounds sterling.

Income arising from the Fund is distributed to the holders of income units, and reinvested in the case of accumulation units. Investors can buy and sell units on demand when the scheme prices every Wednesday, which is a business day, at 10.00am.

Risk and Reward Profile

The risk rating of the Fund is category 5 due to the volatility of the Fund price which sits in a range of between 10% and 15%. The risk rating is calculated using historical data and a prescribed standard deviation methodology.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- This indicator is not a measure of the risk that you may lose the amount you have invested.

The following risks are material in addition to the risks captured by the indicator above:

- The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Past performance is not a guide to future performance. There is no assurance that the investment objective of the Fund will actually be achieved.
- Where investments are in the shares of companies (equities), the value of those equities may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events.
- Where derivative investments in the Fund may include a counterparty, there is a risk that the counterparty will not fulfil their obligation.
- This Fund is allowed to use derivatives to achieve its objective. Derivatives can cause a Fund to become leveraged. Leverage occurs when exposure to an area invested in is greater than its amount invested, resulting in the Fund being exposed to a potentially greater loss than the initial investment.
- Significant exposure to a particular industrial sector or geographical region puts the fund at risk of a localised event making a significant impact on the value of the Fund.

All the risks currently identified as being applicable to the Fund are set out in the 'Risk' section of the Prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	7.50%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out	
Ongoing charges	0.95%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charge is based on last year's expenses for the year ending 31st May 2024. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units/shares in another collective investment scheme.

For more information about charges, please see section headed "Fees and Expenses" of the Fund's Prospectus, which is available on request via email to thesisut@tutman.co.uk

Past Performance

(a) The Fund launched in 2007

(b) The bar chart shows the calendar year returns for the last 10 full calendar years. If a column is blank, there is insufficient performance data to provide a complete calendar year of performance

(c) Past performance has been calculated in pounds sterling

(d) Performance will be calculated as Total Return, including all charges levied against the Fund

(e) Past performance has limited value as a guide to future performance

(f) Investments may go down as well as up

1. The investment objective changed in July 2024, prior to this the Fund's performance was achieved under circumstances that no longer apply. From December 2021, the benchmark is IA 40-85% Shares peer group. Prior to this the benchmark was the IA Flexible.

Performance source: Morningstar Direct
